

WeeklyReport_2018-07-09_07-1_E

I think PRML is not suitable for me and I will stop this plan

Progress

1 Regular

- write 3 ACM problems
- watch Machine Learning and having it Deep and Structured(2017) for one class

2 Project: DimensionReduction

- complete the modification and test in Multicore Tsne with Mr.Zhang and Mr.Liu
- next week we will tune the parameter for our algorithm

3 Project: RSATree

- use the Rtree code from github

read the code and understand the algorithm

- research on how to connect to mysql and construct of data

4 Project: Large Graph

- research on OGDF and BGL

Recent perspective

Work	deadline	Tip
complete the tuning of DimensionReduction	Sunday	
5 problems on ACM	Sunday	
Machine Learning and having it Deep and Structured(2017)	Sunday	one class
kaggle titanic contest	Friday	

Long-term perspective

Work	deadline	now
RSATree Project	9.01	write the Rtree
learn pytorch	9.01	a new plan and has no decision yet
